

Cheeselands Field Improvement

Your Parish Council would like to invite your support to improve the Cheeselands Field. This community green space is in the heart of the village yet close to the countryside. It could become part of the network of footpaths around the village.

We hope to have some plans and concept drawings ready by April 2020, in time for a full Parish consultation.

However, to help us in generating these ideas and creating a vision, we need to set up a panel/focus group to meet and share ideas in February, before we develop a detailed plan.

We are looking for a broad range of people with every age group to be represented, ideally, from 9 months to 109 years. We hope to have about 15 people on the panel. However, it is more important that we have a range of voices and ideas, so the number may vary. We would like as many streets of the Village and Parish as possible to be represented.

Please complete this form if you'd like to join this panel

Tick against the all of the relevant criteria in the list below, so we can ensure a broad range of voices
